

Course Syllabus

General Information

Faculty	Information Technology		
Department	Computer Science		
Semester	Second Semester	Academic Year	2025/2026

Course Details

Course Title	Visual Programming			Course No.	0413203		
Type of Learning	☐ On- campus ☐ Blended (..... Platform) ☐ Online (..... Platform)						
Credit Hours	2	Theoretical	2	Practical	0		
Course Level (according to JNQF)			7	JNQF Hours*		12	
Pre-requisite	Object-Oriented Programming (0401124)			Co-requisite		N/A	

Course Instructor Information

Instructor Name	Zaid Alhalhouli		
Instructor E-mail	z.alhalhouli@meu.edu.jo		
Course Time			
Office Hours			
Office Number	N112	Office Phone	N/A
Lab Instructor Name –If assigned			

Sources and References

1. Textbook
Starting out with visual C#, Tony Gaddis, 2021, 5th Edition, Pearson.
2. References
1. Visual C# How to Program, Harvey Deitel, 6th Edition, 2017. 2. Programming with Microsoft Visual Basic, Diane Zak, 8th edition, Cengage, 2017. 3. Microsoft Visual Basic 2017 for Windows, Web, and Database Applications: Comprehensive, 1st Edition Corinne Hoisington, Cengage, 2018.

Teaching Methods

|-----------------|-----------------------|-------------------------------|
| 1. Lectures | 2. Case Studies | 3. Interactive Demonstrations |
| 4. Presentation | 5. Collaborative Work | 6. Quizzes |

Course Description

In this course, point-and-click methods will be combined with elementary programming concepts to develop Windows applications with a graphical user interface. Topics include input and output tools, control structure debugging techniques, library functions, file manipulation, GUI programming and more.

Course Learning Outcomes (CLOs) and its correlation with Program Learning Outcomes (PLOs) and JNQF Descriptors

. No	CLOs	PLOs	JNQF Descriptors		
			Knowledge	Skill	Competency
1	Apply visual programming concepts and graphical user interface design.	PLO2: Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.		✓	
2	Design and implement event-driven visual programming solutions.	PLO6: Apply computer science theory and software development fundamentals to produce computing-based solutions.		✓	
3	Implement programming logic involving sequence, selection and repetition in visual environment.	PLO2: Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.		✓	
4	Develop complete visual business applications to serve a business or industry.	PLO6: Apply computer science theory and software development fundamentals to produce computing-based solutions.		✓	

Course Topics

Week	Topic	Lecture Type		CLOs	Assessment	
		Lecture No.	Lecture Type		Assessment Tool	Summative/Formative
1	Introduction to visual programming concepts and Visual C sharp.	Lecture (1)	Lecture	1	Discussion	
		Lecture (2)	Lecture	1	Discussion	
2	Forms, controls and events.	Lecture (1)	Lecture	2	Discussion	

Week	Topic	Lecture Type		CLOs	Assessment	
		Lecture (2)	Lecture		Discussion	
3	Variables, input and output, arithmetic operations, three types of errors.	Lecture (1)	Lecture	2	Discussion	
		Lecture (2)	Lecture	2	Discussion	
		Lecture (1)	Lecture	2	Discussion	
4	Integer, Double, and Decimal data types, built-in functions.	Lecture (2)	Lecture	2	Quizzes	Summative
		Lecture (1)	Lecture	2	Discussion	
5	String datatype, string properties and methods, concatenation, dialog-box.	Lecture (2)	Lecture	2	Discussion	
		Lecture (1)	Lecture	3	Discussion	
6	Decisions, if-statement, nested if blocks, else-if clause	Lecture (2)	Lecture	3	Discussion	
		Lecture (1)	Lecture	3	Discussion	
7	General Procedures.	Lecture (2)	Lecture	2	Discussion	
		Lecture (1)	Lecture	3	Discussion	
8	MidExam	Lecture (1)	Assessment	1,2,3	Rubric	Summative
9	Repetition, Do loop, For Next loop.	Lecture (2)	Lecture	3	Quiz 2	
		Lecture (1)	Lecture	3	Assignment 2	
10	Arrays.	Lecture (2)	Lecture	3	Discussion	
		Lecture (1)	Lecture	4	Discussion	
11	Text files.	Lecture (2)	Case Study	4	Discussion	
		Lecture (1)	Lecture	4	Discussion	
12	Database management.	Lecture (2)	Collaborative Work	4	Quizzes	
		Lecture (1)	Presentat ion		Project	Summative
13	Presentation of Projects.	Lecture (2)	Presentat ion		Project	Summative
		Lecture (1)	Assessm ent	2,3,4	Rubric	Summative
14	Final Exam	Lecture (1)	Assessm ent	2,3,4	Rubric	Summative

Course Evaluation Time and Weight

Assessment Tool	Weight %	Expected Due Date
Mid Exam	25%	Week 8
Quizzes	20%	Week 4, Week 7, Week 10
Project	15%	Week 13
Final Exam	40%	Week 14

Course Policies

Item	Policy
Quizzes	- No makeup quizzes. - A minimum 2 quizzes are given. - Each Quiz is out of 5. - If five quizzes or more are given, then the lowest quiz's grade is dropped.
Exams	- The format of the exams is generally (but NOT always) as follows: General Definitions, Multiple-Choice, True/False, Analyze a Problem, Essay Questions, etc.
Makeup Exams	- .Makeup exam should not be given unless there is a valid excuse
Drop Date	- Last day to drop the course is according to the University regulations.
Academic Honesty	- Cheating or copying on exam or quiz is an illegal and unethical activity. - Standard MEU policy will be applied. - All graded assignments must be your own work (your own words).
Attendance	- Excellent attendance is expected. - MEU policy requires the faculty member to assign ZERO grade if a student misses 20% of the classes. - Sign-in sheets will be circulated. - If you miss class, it is your responsibility to find out about any announcements or assignments you may have missed.
E-Learning	- It is your responsibility to check the course's eLearning website regularly (at least once every 2-3 days) for announcements and material.
Workload	- The student should expect to spend 6 hours per week as an average workload.
Graded Exams	- Exams grades should be published on online services when available.
Participation	- Participation in and contribution to class discussions will affect your final grade positively. Raise your hand if you have any questions. - Making any kind of disruption and (side talks) in the class will affect you negatively.
Assignment/ Projects	- Students organize themselves in teams of (2-3) students each. Each team will give at least one presentation regarding a selected case, delivering a fully working application. - More details about phases and topics of the projects will be given later on.
Others	- All mobile phones and/or other communication devices should be turned off before entering the classroom.

Rubrics and Feedback (If Applicable)

* JNQF Hours Calculation

Activity	Duration/ week	Times/ Semester	No. of Hours
Learning Activities			
Lectures and Seminars	2 hours	14	28
Tutorials			
laboratory	2 hours	14	28
Activities for Assessment and Evaluation			
First Exam/Midterm	1.5 hours	1	1.5
Second Exam (If applicable)			
Final Exam	2 hours	1	2
Quizzes	15 minutes	2	0.5
Self-Learning Activities			
Assignments/Homework	1.5 hour	2	3
Case Studies	0	0	0
Presentations	2 hours	1	2
E-learning	0	0	0
Extra Readings	4	14	56
Total Hours	121		
JNQF Hours	121/10 = 12.1
