

Course Syllabus

General Information

Faculty	Information Technology		
Department	Computer Science		
Semester	1	Academic Year	2025-2026

Course Details

Course Title	Web Application			Course No.		0413201	
Type of Learning	☒ On- campus ☐ Blended (..... Platform) ☐ Online (..... Platform)						
Credit Hours	3	Theoretical	2	Practical	1		
Course Level (according to JNQF)			7	JNQF Hours*		12	
Pre-requisite	Object-Oriented Programming C++- 0411203			Co-requisite		N/A	

Course Instructor Information

Instructor Name	Ala Alkhresheh		
Instructor E-mail	a.khresheh@meu.edu.jo		
Course Time			
Office Hours			
Office Number	N 347	Office Phone	
Lab Instructor Name –If assigned-	N/A

Course Description

Introduction to fundamental concepts and technologies in web development, covering the structure of the World Wide Web: web servers, clients, and protocols such as HTTP and HTTPS; essential languages and tools for creating modern web applications: HTML5 for page structure, CSS3 for styling, JavaScript for client-side interactivity, PHP for server-side programming; practical experience through assignments and hands-on labs: client-side and server-side integration, dynamic web application development.

Course Learning Outcomes (CLOs) and its correlation with Program Learning Outcomes (PLOs) and JNQF Descriptors

No.	CLOs	PLOs	JNQF Descriptors		
			Knowledge	Skill	Competency
1	CLO1: Describe the functioning of the Web, including the roles of web servers, browsers, and protocols: HTTP, HTTPS.	PLO 2: Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline	K-I		
2	CLO2: Develop structured web pages using HTML5, ensuring adherence to web standards: accessibility, semantic markup.	PLO 2: Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.		S-P	
3	CLO3: Apply styling to web pages using CSS3, focusing on layout, typography, and responsive design.	PLO 2: Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline		S-P	
4	CLO4: Implement basic interactivity on web pages using JavaScript, including event handling and DOM manipulation.	PLO 2: Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline		S-P	
5	CLO5: Build dynamic server-side applications using PHP, handling form data and connecting to databases.	PLO 2: Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline		S-P	
6	CLO6: Integrate client-side and server-side components into a unified web project, demonstrating a basic full-stack web application.	PLO 6: Apply computer science theory and software development fundamentals to produce computing-based solutions.		S-P	

Course Topics

Week	Topic	Lecture Type		CLOs	Assessment	
		Lecture No.	Lecture Type		Assessment Tool	Summative/Formative
1	Introduction to the Web and HTML5 Basics	1	On Campus	1		
2	HTML5 Semantic Structure and Accessibility	2	On Campus	2		
3	Advanced HTML5 and Form Handling	3	On Campus	2	Assignment	Summative
4	Introduction to CSS3	4	On Campus	3		
5	CSS Layout Techniques	5	On Campus	3		
6	Responsive Design with CSS3	6	On Campus	3	Assignment	Summative
7	Introduction to JavaScript	7	On Campus	4		
8	<u>Midterm Exam</u>	8	On Campus	1,2,3,4	Exam	Summative
9	JavaScript DOM Manipulation	9	On Campus	4		
10	Advanced JavaScript Concepts	10	On Campus	4	Assignment	Summative
11	Introduction to PHP	11	On Campus	5		
12	PHP and Databases	12	On Campus	5	Assignment	Summative
13	JavaScript and PHP Integration	13	On Campus	6		
14	Practical JavaScript Applications	14	On Campus	4		
15	Review and Deployment Basics	15	On Campus	6	Project	Summative
16	<u>Final Exam</u>					Summative

Course Evaluation Time and Weight

Assessment Tool	Weight %	Expected Due Date
Mid Exam	25%	Week 8
Quizzes	20%	Week 6,10
Project	15%	Week 15
Final Exam	40%	Week 16

Course Policies

Item	Policy
Quizzes	No makeup quizzes. A minimum 2 quizzes are given. Each Quiz is out of 5.
Exams	The format of the exams is generally (but NOT always) as follows: General Definitions, Multiple-Choice, True/False, analyze a problem, Essay Questions, check the scenario etc.
Makeup Exams	Makeup examinations will only be considered under the following circumstances: If a health-related condition necessitated hospitalization. In the unfortunate event of the passing of a close immediate family member.
Drop Date	Last date of Dropping all the semester courses is 22 nd June 2024.
Academic Honesty	Academic honesty encompasses a commitment to truth and ethical behavior in all academic activities. It includes, but is not limited to, the following principles: 1. Plagiarism: Presenting someone else's work, ideas, or words as your own without proper citation. 2. Cheating: Using unauthorized aids, resources, or methods to gain an unfair advantage in assessments or assignments. 3. Fabrication: Inventing or falsifying data, information, or sources in academic work. 4. Collusion: Collaborating with others without authorization when independent work is required. The minimum penalty for any of the above is an automatic Zero for the test or assignment leading to a possible "F" for the course.
Attendance	▪ The MEU recognizes that class attendance is an important element of students' classroom success. Students are expected to attend all classes, laboratories, and/or required fieldwork. Because excessive absences prevent students from receiving full course benefit and disrupt orderly course progress. ▪ Any student who misses MORE THAN 15% of the class sessions of any course during a semester will be illegible to sit for the final exam and will receive a grade of "F" in the course. ▪ In the case (b) above, if a student submits official documented evidence of inpatient medical care authenticated by the Medical Services Department or an accepted excuse by the Dean of his/her faculty, he/she will be considered as withdrawn from the course, and a "W" will be shown in the transcript for this course. ▪ If you miss class, it is your responsibility to find out about any announcements or assignments you may have missed.
E-Learning	It is your responsibility to check the course's eLearning website regularly (at least once every 2 days) for announcements and material.
Workload	The student should expect to spend 6 hours per week as an average workload.

Graded Exams	Instructor should return exam papers graded to students within one week after the exam date.
Participation	Participation in and contribution to class discussions will affect your final grade positively. Raise your hand if you have any question. Making any kind of disruption and (side talks) in the class will affect you negatively.
Assignment/ Projects	Assignments are as mentioned in the previous table, and it will be in forms of problem-solving reports. Students Projects are individually for this course and will give at least one presentation regarding a selected case, delivering a fully working application. More details about phases and topics of the projects will be given later.

Rubrics and Feedback (If Applicable)

--

* JNQF Hours Calculation

Activity	Duration/ week	Times/ Semester	No. of Hours
Learning Activities			
Lectures and Seminars	14	2	28
Tutorials			
laboratory	14	2	28
Activities for Assessment and Evaluation			
First Exam/ Midterm	1	1	1
Second Exam (If applicable)			
Final Exam	1	2	2
Quizzes	2	0.5	1
Self-Learning Activities			
Assignments/ Homework	1	3	3
Case Studies			
Presentations	1	2	2
E-learning			
Extra Readings	14	4	56
Total Hours	121		
JNQF Hours	121 / 10 = 12.1
